Lesson Five

Reading

1 Look at the story. Choose the best title. Write the title at the top.

- a) A lovely day on the river b) An adventure on the river c) A storm at sea

It was a summer morning. The river was calm. The clouds in the sky were light, like smoke.

"I want to go out in the boat," said Jack.

"OK, let's go!" said Harry.

After half an hour on the river, Jack stopped rowing. The boat floated quietly on the water. The sun was warm, and Jack and Harry soon fell asleep with the sun on their faces. They slept for a long time.

When they woke up, the sky was dark. There were storm clouds above them. A flash of lightning lit the sky.

"A storm is coming!" Harry said, nervously. And, very soon, the wind started to get stronger and stronger. Waves hit the boat with a splash and heavy rain started to fall. Jack was rowing when he dropped the oars by accident and they floated away. Without the oars, the boys couldn't row. They didn't know what to do.

Then a big wave hit the side of the boat. The boat turned over, and Jack and Harry were thrown into the water.

"Grab the boat!" Jack shouted. They held on tightly to the boat as the water carried them along.

At last, the boat hit some rocks near the river bank. The boys felt the ground under their feet and slowly they got to the bank. When they looked back, their boat was gone.

"Where are we?" Jack asked. "Will someone rescue us?"

Then they saw some smoke from behind the trees. "Maybe it's a house!" Harry said. They walked along the path between the trees – and stared in surprise.

2 Read again and number the pictures in the correct order.

Words in context

1 Read and circle.

Give me the oars, Harry. I'll ¹ row / sail.

Jack! We fell asleep – and we didn't ² climb / tie the boat to a tree!

The boat is still ³ floating / swimming. We can hold on to it.

Oh, no! The boat is going to ⁴ splash / hit the rocks!

What are you ⁵ shouting / staring at, Harry?

Can you see the ⁶ splash / smoke in the sky?

18-year-old Henry Watson is a volunteer with an environmental group called EcoTask. EcoTask is an organization that helps to protect the environment.

People with different skills

volunteer to work for them

and EcoTask has lots of interesting ways for volunteers to help the environment. Henry Watson is a talented diver and he is using his skills to help protect wildlife under the ocean.

Henry is spending three months at an EcoTask center on the Andaman Sea in Thailand. The center provides all the diving equipment he needs and also gives training to people to teach them what to do.

Henry works in a team with 15 other volunteers. He dives into the ocean and records what he sees. He writes down the different types of fish and other sea animals he sees, and he reports any problems. He also tests the water for pollution. This is very important.

"I wanted to do something different before I go to college. I've always loved diving and I want to help the environment, so this project is perfect for me," Henry says. "The underwater life in the Andaman Sea is amazing and it's very important to protect it. Our research helps to do this."

He would like to stay in Thailand when the three months finish. "The best volunteer in each group can stay and work here for another two months," he says. "I hope it's me! I'd really like to stay here longer!"

1 Read the article and choose a description. Who is the course for?

- a people who love spiders
- b people who want to keep spiders as pets
- c people who are afraid of spiders

FACE YOUR FEAR!

Are you afraid of spiders? Would you like to learn to face your fears? Here at Columbus Zoo we have a special course for people with a phobia about spiders. The course lasts for four hours, and includes talking about your fear in a group, finding out facts about spiders (hardly any of them are dangerous!) and at the end, if you want to, you can pick up a spider!

Here's what one person said about the course.

The course was very good. I learned a lot about spiders – I didn't know they were so interesting!! When I saw the spider, like everyone else there, my first response was to run away – but I couldn't move any muscles! My legs felt like jell-o. I was concentrating hard. I could feel the blood rush to my brain. My heart was beating loudly in my chest and I was sure everyone could hear it. My mouth was dry and I was breathing very fast. But then I tried to relax and to breathe slowly. I told myself over and over again, "It isn't dangerous, it won't bite me." And it worked! I have a photo of the spider in the palm of my hand to prove it!
Diego, 12

So, if you want to learn to face your fear of spiders, call today to book your place on the next course!

2 Read again and write *True* or *False*. Correct the false answers.

- 1 The spider phobia class at the zoo lasts a whole day. False. It lasts for four hours.
- 2 Diego learned some interesting facts about spiders. _____
- 3 Most people at the course had the same response before picking up the spider. _____
- 4 Everyone at the course has to pick up a spider in their palms. _____
- 5 When Diego saw the spider, he couldn't concentrate. _____
- 6 Diego didn't know if the spider was dangerous or not. _____

Every year in late August or early September, there is a special festival in a little town called Hatch, in New Mexico, U.S.A. The festival lasts for one weekend, and it celebrates chili peppers, the most famous food from this area. Farmers grow chilies in the local area and in late August or early September, the chilies are ready to be picked and eaten! Then, everyone gets together and celebrates the chili!

You'll know when you get close to Hatch, because you'll smell the chilies cooking over fires. People eat chilies with everything – even with chocolate! Chili chocolate is delicious! In town there are chilies everywhere. People decorate the buildings with chilies. They hang big bunches outside their houses. Some people even cover their walls and roofs with chilies!

Visitors come to the festival from all over the U.S.A. There are music groups and traditional dances, and you can also watch cooking demonstrations which show you how to make dishes with chilies. On both days there are competitions. For example, there is a prize every year for the person who can eat the most chilies, and another prize for tying chilies into the biggest bunch. Lesson Five

Reading

1 Look at the text. Choose the best title. Write the title at the top.

- a) Across the desert by camel b) A drive across the desert c) The camel doctors

The desert is one of the most difficult environments in the world to travel through. The sand dunes are difficult to climb and, in the daytime, the sun is bright and the temperatures are very high. You can travel for many days and weeks without finding any water or food.

Long before cars, people used camels to cross the desert. Camels are ideal desert animals. They can carry heavy loads of up to 450 kilograms and they can walk for days without water. When they find water, they can drink up to 100 liters of water in ten minutes! Camels can eat almost any plant they find in the desert. Their milk is very good to drink and it is full of vitamins, so people traveling in the desert can drink the camel's milk and stay healthy. Camels were used to bring packages

of food and other supplies to faraway villages. Sometimes, camels were used by people who wanted to sell goods in different places. In more recent times, they carried equipment for building railroads.

Today, we have 4 x 4 vehicles that can travel over the sand, but cars sometimes break down in the hot temperatures. This can be very dangerous as you can be miles from a village with no transportation! Camels can travel long distances to places that have no roads or railroads to connect them to other towns. In Mali, in Africa, camels carry blocks of salt for 800 kilometers over high sand dunes to Timbuktu, where they are sold. In other places, camels take important medicines to desert villages. Life in the desert would be much more difficult without camels!

2 Read again and write *True* or *False*.

2 Read the information and match.

The first hot-air balloon was invented by two French brothers, Joseph and Etienne Montgolfier. They got the idea when they found that hot air from a fire made a paper bag rise into the air.

In September 1783, the brothers made a big balloon from cloth and paper. They made a fire under it. They thought it might be dangerous to go up in it themselves, so the first passengers were a duck, a sheep, and a chicken!

In November that year, two friends of the Montgolfier brothers went up in a similar balloon. The balloon rose to 150 meters and floated for nine kilometers over the city of Paris – and it came down safely.

Boomerangs are well known in Australia, where they have been made by the local people for the past 10,000 years. However, boomerangs were

¹ invented much earlier and were also used in other parts of the world. A 30,000-year-old boomerang was ² discovered in a cave in Poland and, in Egypt, King Tutankhamen owned some of these interesting ³ devices.

We don't know where the ⁴ inspiration for the boomerang came from but, at first it, was ⁵ designed for hunting animals, not for sports. Then people saw that when they threw a small boomerang in a special way, it flew through the air and came back to them. After more ⁶ experiments, the "returning" boomerang was made. Now it is mainly used for sports.

Reading

1 Look at the pictures and check (✓) two things a pencil has inside it. Read and check your answers.

- a) graphite ☐ b) ink ☐ c) clay ☐ d) stone ☐

The pencil

We all have pencils in our backpacks and in our homes, but do you know how they are made?

A pencil is usually made of wood, with pencil lead inside. Pencil lead is a black material. It is made with graphite which is mixed with clay.

This mixture is pressed into thin rods to form the center of the pencil. The thin rod is the part of the pencil that leaves marks on the paper when we write. The wooden part outside this is the part that we hold.

People first discovered the use of graphite for writing in the 16th century. Early pencils from this time were just pieces of graphite wrapped in sheepskin or string. Then, in the 18th century, the pencil was changed. A hollow space was

made in a piece of wood, then a rod of lead was put in, and then another piece of wood was glued on top. After that, the pencil was cut to a sharp point at one end. So pencils don't need to have a nib in them like pens do.

Today, wooden pencils are made by machines in factories. Pencils are also made of plastic or metal, and they sometimes have cartridges filled with lead. There are even pencils with different colors. There are also pencils that can write underwater!

Pencils are used all around the world. More than 14 billion pencils are made in the world every year. That's enough to go all the way around the Earth 62 times!

Topic: Energy

1 Read and match the photos to the paragraphs.

A Smart energy

Before our non-renewable energy sources like coal and oil start to run out, we need to think of new ways to use renewable forms of energy in our daily lives. Here are some ideas.

B Floating wind farms

People don't always like to see wind turbines in the countryside. They are very big and the blades are noisy. For this reason they are often put in the ocean. Now engineers have built floating wind turbines. These can be far out in the middle of the ocean, where the wind is strongest, and where they can produce the most energy. In 2011, the first floating wind turbine was built on the coast of Portugal. There are plans now to build the world's first floating wind farm in Scotland, with eight turbines, by 2017.

C Energy from muscles

At a gym in Hong Kong, there are exercise machines with generators that can produce energy from movement. So, while you work out you can produce electricity at the same time! If the gym gets busy, it doesn't have to use fossil fuels for its electric lights.

D Solar fashion

Dutch fashion designers are working with solar energy scientists to create clothes that contain silicon panels. When you wear these clothes, you can recharge your cell phone in your pocket. There's only one problem - it has to be a sunny day!

2 Correct the word in bold.

- 1 Oil is an example of a **solar** energy source.
- 2 Wind is an example of a fossil fuel.
- 3 More energy can be produced by **solar** turbines in the ocean.
- 4 People can produce energy in the gym by **floating** on the machines.
- 5 Some clothes will have silicon **blades** to produce energy.
- 6 Solar energy can only be produced in the **dark**.

non-renewable

1 Listen and underline the wrong information. Write the correct information. 52

- a The men are putting solar panels on the walls of the house. roof
- b Solar power is a non-renewable form of energy.
- c Luke went to visit his friend in Texas.
- d Luke thought the wind farm was boring.
- e The blades of the wind turbine produce electricity.
- f The windmills are very small.

One day, there won't be much wood or coal left, so Palesa's project will change the lives of the people there.

William Kamkwamba, from Kenya, was 14 when he made a windmill. For the ³ _____, he used parts of old farm machines and vehicles. He used a car battery to make the ⁴ _____. The windmill produced electricity for his family to use on their farm.

A new plane has been invented. It doesn't use gasoline to fly. Instead, big solar ⁵ _____, which are made from ⁶ _____, use the sun to generate ⁷ _____.

The history of cell phones

1 The first cell phone call

On April 3rd, 1973, Martin Cooper from the Motorola company talked on his cell phone as he walked through the streets of New York. People watched with excitement and amazement. At that time, even normal phones were attached by wires and cords, and people had never seen anything like it before! It was the world's first cell phone call. The phone weighed 850 grams! It was very heavy! Now, cell phones weigh about 130 grams!

2

In the 1970s, cell phone technology was still experimental. Cells weren't available to the public until 1983, when the DynaTAC 8000X was created. It was huge – 32 cm long and 9 cm wide! It took ten hours to charge the battery and you could only talk for 30 minutes. It was also expensive. The phone cost \$3,995! Only very rich people could buy one!

3

Martin Cooper had a dream of people taking their phones with them and being able to communicate wherever they were. However, in the early days, nobody knew if cell phones would be popular. One company said they expected a world market of 900,000 by the end of the year 2000. They were wrong! By that time, cell phones were cheap enough for ordinary people to buy. They were also much smaller and looked much better than the DynaTAC! Millions of people were using them.

4

Cell phones have changed a lot since the 1980s. We can use them to take photos, watch videos, surf the Internet, and do many other things. Today, there are billions of cell phones in the world. Life would be very different without mobile phones. They have changed the world!

2 Read again and write *True* or *False*.

- 1995:** text messages could be used by everyone
- By 2014:** over 50 billion text messages sent every day

Fun facts

- A text message is also called an SMS. This is short for "Short Message Service"!
- Texts in English can be 160 characters long. Characters means the letters, spaces, and punctuation. In other languages, there are usually fewer characters because each letter takes up more space.

Quotes

- Alex Brenner worked for a cell phone company in the 1990s. He said, "No one believed text messages would become popular. We were all wrong!"

The Ship of Gold

On a sunny day, September 3rd 1857, the SS Central America left Panama in Central America, and sailed north to New York City. On board there were 477 passengers and 101 crew – and gold.

A few days later, on September 7th, the ship stopped in the harbor of Havana, where the passengers and crew went shopping for souvenirs, and explored the sights of the town. The voyage continued, with sunny and calm weather.

Then on September 9th, a hurricane hit the coast. Water began to cover the ship's deck. The passengers and crew tried to get help, but no help came.

All night, the passengers and crew tried to empty the water from the deck. The next morning, they saw two ships nearby. 153 people, mainly women and children, sailed to the ships in small boats. That night, the ship sank to the bottom of the sea. 425 people drowned.

More than a hundred years later, in 1986, underwater explorers decided to search for the

shipwreck. Passengers' descriptions gave them clues about where the ship was. The explorers used an underwater robot called Nemo, to find it. Finally, after about a year, Nemo took photographs which showed 19th century objects inside the wooden part of a ship. But that wasn't all. They also discovered the real treasure – about 7,000 gold coins.

Reading

1 Look at the text. How many statues are on the island? Check (✓) the correct answer.

- a) 3,500 ☐ b) 150 ☐ c) 800 ☐

In this interview, Amy Green talks about Easter Island.

Where is Easter Island?

Easter Island is in the South Pacific Ocean, 3,500 kilometers from Chile. People live on the island today, but it is difficult to live there as it is so far away from anywhere else. Easter Island is made from three volcanoes, but these don't erupt anymore. The last time the volcanoes erupted was over 100,000 years ago.

Why is the island famous?

The island is famous for its mysterious stone figures. These are known as "Maoi." These statues are between three and twelve meters tall and there is a platform underneath. Today, there are more than 800 statues on the island, but in the past there were more. Some have been destroyed and others are now under the soil.

Why were the statues made?

No one really knows as there is no written information about them. However, many historians think that they are figures of important people from the island. The statues were made over a period of 1,000 years. Historians think the oldest statues were made in about 1000 AD.

How were the statues made?

They were made in the quarry from soft volcanic stone. Then, historians think that people moved them on wooden rails. However, 150–180 people were needed to move each statue and some statues were moved more than 22 kilometers! One third of the statues were not moved from the quarry and are still there today.

Are there any other mysterious things on the island?

Yes, there are stones with ancient carvings, sketches, and writing on them. However, there isn't anyone who can read the writing and so we can only guess at the meaning.

2 Read again and circle.

- 1 Easter Island is in the South Pacific / Atlantic Ocean.

1 Read the text and check (✓) the sentence that is true about King Tutankhamun.

- a) He became a king when he was 19. ☐ b) He died when he was 19. ☐
c) Archeologists found his remains 19 years ago. ☐

Today in History

November 26th 1922

Tutankhamun governed ancient Egypt for about ten years from 1336 B.C. to 1327 B.C. – he was only nine years old when he became King. However, he only really became famous because of his tomb in the Valley of the Kings, in Egypt.

An English archeologist, Howard Carter, spent a long time on a dig, trying to find the tomb of the ancient King. Finally after five years, on November 26th 1922, he found it.

The tomb had several different rooms. In the biggest room, they found his coffin. It contained the remains of the nineteen-year-old

King, in the form of a mummy. The striped mask, over the face of the King, has a bird and a snake at the top. The mask is now in Cairo Museum, with many other artifacts from the tomb – ceramics, jewelry, and food and drink. You can also see four stone containers, which contain the lungs, heart, and other parts of the King's body! The Egyptians wanted to protect the King's body this way. Fortunately there were people in England who could read the hieroglyphics on the objects. There wasn't a lot of technology at this

time, so this writing told us a lot about the life of ancient Egyptians. Then, in the 1960s, people started using technology to study the mummies. At first, scans of the mummies weren't very clear, but new CT scanners mean that we can find out even more about the health, diet, and lives of the ancient Egyptians.

Island Adventure

Island Adventure is a book about a group of survivors on a desert island!

The main character in the story is a 14-year-old boy called Robert Wilson. At the beginning of the story, he lives in New Zealand with his family. But when his parents die in a mountain climbing accident, Robert is suddenly alone. He decides to leave New Zealand and go to the U.S.A., where his aunt lives. She is the only family he has left.

Robert finds a ship that is sailing to the U.S.A. It is a long and difficult voyage. There are storms and rough seas. The wind pushes the ship in a different direction and the ship gets lost. Finally, it is shipwrecked near an island in the middle of the ocean. When the ship sinks, Robert is one of only six survivors who manage to swim to the island.

The year is 1870. So, there aren't any airplanes flying over or boats passing by, and there is no one who

can find them and rescue them. The six people have to start a new life on the island. They collect wood to make fires. They have no food supplies, but they learn to hunt seals for food and clothing. They cut down trees to build wooden huts for shelter against the wind and rain. But winter is coming, and it is getting colder and colder. The survivors don't know if they can survive the cold weather. But they will do everything they can and fight to survive!

If you like exciting stories, you'll love this book!

2 Read and circle the incorrect words. Write the correct words.

- The story is about people who survive on an adventure.
- Robert goes on the ship to live with his parents in the U.S.A.
- The weather is dangerous for sailing because there are floods.
- Robert survives with six other people.
- They learn to hunt dolphins for food and clothing.
- They find wooden huts on the island.

The country of languages!

¹ How many languages are spoken in Papua New Guinea?

Papua New Guinea has a population of just six million people, but it has more languages than any other country in the world. More than 800 languages are spoken there. That's over 13% of all the languages in the world!

²

The three official languages are Hiri Motu, Tok Pisin, and English. For most people, these are not their mother tongue, but they can be used to communicate with each other when they talk to someone from a different group.

³

English is important as an international language. About 50,000 people speak English as their first language. English is used in schools and businesses. However, many people speak lots of languages.

⁴

The first inhabitants of Papua New Guinea were tribes that arrived from different parts of Asia more than 50,000 years ago. They brought lots of languages with them. Over time, the languages they spoke developed into the ones that are spoken in Papua New Guinea today.

⁵

All these languages are still alive because many people live in very isolated places. Tribes don't mix with other tribes, but keep their own culture, traditions, and languages separate. Today, only 18% of people live in cities and there still aren't many roads connecting the villages. So, people stay in their own groups and speak their traditional languages. That's why Papua New Guinea's languages have survived.

Science Time!

Topic: Light

- 1 Read the text below. What is the difference between a rainbow and a moonbow?

Astronomers and scientists have found out many interesting facts about natural phenomena.

Did you know?

A solar eclipse is confusing to animals' sleep cycles.

During solar eclipses, birds and insects often become very quiet. The animals can only see the corona, so they think it's night time. Animals that are usually asleep at night start closing their eyes, and nocturnal animals start waking up – they think it's time to hunt for food. After the eclipse, which doesn't last very long, they all have to do the opposite thing!

Rows of shadows move quickly across the ground in an eclipse.

This happens during some solar eclipses. As the moon moves across the sun, you can see long rows of gray shadows moving quickly towards you over the ground. It's pretty scary – if you ever see this, you won't forget it!

Rainbows can appear at night.

Rainbows that appear after dark are called *moonbows*. It's the moonlight, not the sunlight, that causes the refraction. There isn't as much light from the moon as from the sun, so it's difficult to see the colors in a moonbow when we look at it. Moonbows are always on the opposite side of the sky from the moon.

Rainbows can be made artificially.

Hold a glass of water above some white paper in the sunlight. Watch as the sunlight passes through the water. It refracts and then splits into the different colors of the spectrum on the paper. You've made a rainbow!

My Dream Trip

My name's Becky. I love traveling and one day I'd like to go around the world. When I'm older and I've finished school, I will travel around the world for a year! It will be great.

I read lots of books about different places around the world and I dream about all the places I want to visit. I have already planned where I want to go when I'm older. I know which countries I want to visit and what I want to see when I'm in each one.

First, I'll go to China and walk along part of the Great Wall. What an experience! Did you know that it's 6,400 kilometers long!

After China, I'll go to Thailand. I'd like to travel through the busy streets of Bangkok in a rickshaw. I'll stop at a street market and try the food.

Thai curry is my favorite meal. I like the mixture of sweet and sour flavors.

My next stop will be Borneo. I'm interested in wildlife and Borneo's forests are the home of orangutans, rhinos, and leopards. However, there are some scary animals in the forest, too, like snakes and poisonous spiders. So, maybe I won't spend too much time in Borneo!

After Borneo, I'll visit Australia. It has sun and beaches, so it's the perfect place to relax. My favorite sport is surfing and Australia has some of the best surfing beaches in the world. I could also learn to dive and look at the coral reefs. The water in Australia is very clear, so I could see lots of fish. I wish I was there now! Unfortunately, I have to wait until I'm old enough!

2 Read again and complete the sentences.

- Becky's favorite food is cooked in Thailand.
- The Great Wall is in China.
- Becky can do her favorite sport in Australia.
- Becky will travel in a rickshaw in Bangkok.
- Becky will see lots of wildlife in Borneo.
- Becky is worried about the scary animals in Borneo.
